

Work out the answer to the sum. Split your answer up into 2 numbers. The first number goes across and the second number goes up. Example: $27+4=(3,1)$

Join the dots up after each sum

9									
8									
7									
6									
5									
4									
3									
2									
1									
0									

1. $2 \times 6 = (\quad , \quad)$ 2. $40 - 17 = (\quad , \quad)$ 3. $11 \times 3 = (\quad , \quad)$ 4. $60 - 17 = (\quad , \quad)$
 5. $22 + 32 = (\quad , \quad)$ 6. $13 \times 5 = (\quad , \quad)$ 7. $100 - 24 = (\quad , \quad)$ 8. $7 \times 11 = (\quad , \quad)$
 9. $39 \times 2 = (\quad , \quad)$ 10. $90 - 1 = (\quad , \quad)$ 11. $40 + 48 = (\quad , \quad)$ 12. $7 \times 14 = (\quad , \quad)$
 13. $25 \times 6 = (\quad , \quad)$ 14. $49 + 23 = (\quad , \quad)$ 15. $50 - 24 = (\quad , \quad)$ 16. $7 \times 4 = (\quad , \quad)$
 17. $9 \times 5 = (\quad , \quad)$ 18. $13 + 21 = (\quad , \quad)$ 19. $11 \times 3 = (\quad , \quad)$ 20. $8 \times 4 = (\quad , \quad)$
 21. $7 \times 3 = (\quad , \quad)$ 22. $44 - 22 = (\quad , \quad)$ 23. $36 \div 3 = (\quad , \quad)$
